-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☐ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claims \_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on \_\_\_\_ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

## Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892)
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 17) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 2.
- 18) ☐ Interview Summary (PTO-413) Paper No(s) \_\_\_\_.
- 19) ☐ Notice of Informal Patent Application (PTO-152)
- 20) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "at least one via comprises a plurality of vias" doesn't make sense.

2. While applicant may be his or her own lexicographer, a term in a claim may not be given a meaning repugnant to the usual meaning of that term. See *In re Hill*, 161 F.2d 367, 73 USPQ 482 (CCPA 1947). The term "dicing" in claim 17 is used by the claim to mean "cutting the cavity into the heater chip," while the accepted meaning is "cutting into small cubes." The use of the term "dicing" is inappropriate since the heater chip is not being to cut into pieces.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 8-12, 15-16 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi (USPN 6033581).

With respect to claim 1 and 9, Kobayashi disclose:

- A heater chip (Fig. 6: element 1) include a backside with at least one cavity (Fig.6, column 4: line 21-22).
- A substrate associated with the backside of the heater chip (Fig. 6: element 6).
- Adhesive at least partially disposed within at least one cavity and on the backside of the heater chip, so as to attach the chip to the substrate (Fig.6: element 9, Column 5: line 43-53).

With respect to claims 2 and 10 Kobayashi discloses that at least one cavity comprises at least one trench (Fig. 2)

With respect to claims 3 and 11, Kobayashi discloses that the heater chip includes at least one ink via (Fig.2: element 2, Column 5: line 13-14).

With respect to claims 4 and 12, Kobayashi discloses that at least one trench substantially surrounds each via (Fig. 2).

With respect to claim 5, Kobayashi discloses that at least one via comprises a plurality of vias and the adhesive being configured for preventing fluid communication between the vias and the substrate (Fig. 4+6).

With respect to claim 8, Kobayashi discloses that the adhesive is substantially entirely disposed within at least one cavity (Fig. 6)

The steps of the method of claims 15, 19 and 20 are deemed to be rendered inherent in view of the functions of the structure discussed above.

With respect to claim 16, Kobayashi discloses that the cavity is formed by micromachining (Column 5: line 40-42).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 6-7, 13-14 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi (USPN 6033,581) in view of Brandon et al. (USPN 5,751,324).

With respect to claim 6-7, Kobayashi teach that the heater chip includes at least one outside edge (Fig. 6).

However, Kobayashi fail to teach at least one trench extending to at least one outside edge to thereby form at least one vent and at least one vent is configured for allowing the adhesive to outgas during curing.

Brandon et al. teaches at least one trench (Fig.4: element 44+46) extending to at least one outside edge to thereby form at least one vent and at least one vent is configured for allowing the adhesive to outgas during curing (Column 2: line 61-63).

While Brandon does not teach providing the trenches in a heater chip, it does provide the general teaching to one of ordinary skill in the art of providing trenches extending to at least one outside edge at a bonding site for the purpose of allowing the adhesive to outgas during curing.

It would have been obvious to one having skill in the art at the time the invention was made to have provided the invention of Kobayashi with at least one trench extending to at least one outside edge to thereby form at least one vent and at least one vent is configured for allowing the adhesive to outgas during curing as taught by Brandon et al. The motivation of doing so is the gas produced during of the adhesive is vented to the outside ambient environment.

The steps of the method of claims 13-14 and 21 are deemed to be rendered obvious in view of the functions of the structure discussed above.

2. Claims 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi (USPN 6,033,581) in view of Mey et al. (USPN 5,821,972).

Kobayashi discloses the claimed invention except the forming a cavity using dicing or laser ablation. Mey et al. shows that cutting using a diamond saw and laser ablation (Column 4: line 25-47) is an equivalent structure known in the art. Therefore, because these two structure were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute diamond saw for laser ablation.

### ***Conclusion***

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Ly T. Tran whose telephone number is (703)-308-0752. The examiner can normally be reached on Monday-Friday (7:15-5:00).

Application/Control Number: 09/625,345  
Art Unit: 2853
